GRAVITY FEED RECOVERY

GFR-2: 2gal Gravity Feed Reservoir

SW-2: 2gal. Silver Recovery Canister

Self contained, stand alone system, needs no electricity.
School Photo Labs, Veterinarian Clinics, Dental offices.

Process:

Silver bearing effluent is hand poured into the top of the reservoir which slowly trickles the effluent into the canister underneath.

The canister uses the metallic displacement process to remove the silver from the effluent which then drains to the sewer.

GFR-2

Reservoir :

Inlet: Removable Cover

Flow restrictor

Diameter: 11"

Height: 9-1/2"

Capacity: 2 gal

Weight: 1 lb

List Price: \$33.00
